THE RALEIGH RECORD

PUBLIC APPENDIX EVIDENCE INDEX

State ex rel. Jackson v. Truman & Bailey — five-volume appendix, Appx. 1–480.

This is an **index to the petitioner-supplied appendix, not a reproduction of the appendix and not independent verification of each allegation**. It identifies what each exhibit is said to contain and how its status is designated in the supplied volume tables. The complete five-volume source set has not been posted publicly because it includes domestic-violence related documents, private communications, witness identifiers, and sensitive criminal-case materials requiring individualized confidentiality review. The public petition is separately available in a privacy-redacted edition.

A filed or accepted petition does not mean the Supreme Court has found misconduct, granted a rule to show cause, or issued mandamus relief. Provisional exhibits are expressly not represented as certified trial-court materials.

VOLUME 1 · APPX. 1–129

Ex.	Appx.	Source description in the record index	Status
